**RODELN 2.0**

## STEERING SLED FOR ADULTS, YOUNG PEOPLE AND CHILDREN

# RODELN 2.0

WITH PROBABLY THE BEST SLEDGE IN THE WORLD

### 1. ENORMOUS SAFETY:

- Significantly reduced risk of accidents through falls or collisions when compared to traditional sledging (we still advise use of a ski helmet)
- Precision turning, no over- or understeer thanks to the non-slip skids
- Easy to bring to halt with its highly effective braking mechanism
- Locking Brakes when not in use
- Safe for use with tow/T-bar/disc lifts (lift system available separately)
- Front and back lighting for night tobogganing (white and red LEDs available separately)

### 2. UNIQUE COMFORT:

- Softens uneven slopes and cushions jumps
- Comfortable, warm and water resistant seating with side grips
- Convenient feet positions for the riders
- Handheld towrope withdraws automatically
- No snow spray in the riders' shoes
- Supports all lift types (adapters for chairlift possible)

### 3. DIFFERENT USES:

- For a variety of snow and ground conditions
- Able to travel over snow-free areas
- For sled tracks, blue slopes and Fun Parks
- Night tobogganing on the slopes or after the "hut-evenings"
- Also of interest to rental businesses, sport shops and high class hotels
- Coupling up to 3 Pistenbocks with connecting rod for 50 mm ball head or J-hooks (for properly hut tours with Ski-Doo, Quad, DER ZIESEL®)

### 4. PROFITABLE BUSINESS FOR SPORTS SHOPS, RENTAL FIRMS, SKI-SLOPE OWNERS, HOTELS, SKI RESORTS:

- Significant increase in attractiveness of sledding
- Higher rental prices can be charged than for the classic sledge
- Guests without the classic winter sport ambitions will be won over
- Winter sportsmen/women who has been scared off by "normal" tobogganing will want to test this new sports equipment
- Winter sport equipment for three generations
- Use of starter slopes (Baby-lifts) will increase
- Less frequented Valley regions can be brought to life through focussed use
- Real looker thanks to its attractive design
